Overall GPA : 3.5/4.0

PROJECTS

Tower of Babel — *Chinese Language Learning Application*

Language learning toolkit written in C# with a backend SQLite database, featuring a comprehensive Chinese database, language learning games, and a Chinese reader which leverages natural language parsing to enhance dialogue and translations.

Heimdall — *System Watchdog*

Heimdall is a Windows system tray application which uses Kernel32 API functionality in order to unobtrusively monitor select folders or paths for modifications and revisions over time in the background.

Sands of Time — *Parental Reporting System*

Keeps track of user's usage habits on a computer and allows parents or administrators to set limitations by day and duration which can be filtered by normal applications or the internet. Employs customized USB dongles to allow for secure access by owners.

ADDITIONAL WORK EXPERIENCE

BKC International House, Moscow Russia — *ESL Instructor*

January 2014 - October 2014

- ❑ Taught adult and teenager classes according to student-centric CELTA methodology
- ❑ Seminar on optimizing education through technology

Kojen English Center 科見美語, Taipei Taiwan — *English Teacher*

September 2008 - September 2011

- ❑ Adult classes in English with an emphasis on practical conversation and grammar.

Georgia Center for Assessment, Athens GA — *Temporary State Rater*

March 2007 - April 2007

- ❑ Assessed 5th grade writing at the state level according to standardized domains
